### **I. History**

Philfresh Corporation was established on September 11, 2009, and is a member of the Citra Mina Group of Companies.

### **II. Products**

There are three major product groups that are being processed: fresh-chilled; super-frozen (frozen at ultra low temperature) and value-added yellowfin tuna products.

- Fresh-chilled yellowfin tuna products consist of: gilled and gutted or clean loins.
- Super frozen yellowfin tuna products of various cuts: ultra premium sushi slices, saku/fillet, steak and kiriotoshi.
- Value-added ready to eat yellowfin tuna products: bottled YF tuna belly in olive oil; YF tuna sisig in pouches and other similar products.

Philfresh also processes sausages and other common ready-to-cook Filipino delicacies such as longganiza, chorizo, embutido and lumpia .

### **III. Market/s**

The super-frozen products of Philfresh Corporation are being sold in the various areas and countries around the world, including Japan, European Union and North America.

The value-added products are mostly distributed in the Philippine market. Product customizations can also be done for foreign/local customers depending on their preference.
